

## Rules 2008/2010

### Established by the ICG at the beginning of 2009 and completed September 2009

#### FUNCTIONING OF THE INSTRUMENTALITY OF THE PASS

##### 1. The list of passers

This is established by the local committees responsible for the Guarantee in each instrumentality. These lists, which name the analyst and proposal dates, are transmitted to the ICG which keeps the list on behalf of all the instrumentalities.

##### 2. The stages of the functioning of the instrumentality

- **Requests for the pass** are received locally by the Secretaries of the *ad hoc* committees, which, in addition, establish the list of passers.

The candidate is received by a member of the Committee of Reception and Guarantee (CRG), who then refers them to the CRG which ratifies or declines the request. The Secretary transmits the response of the CRG to the candidate and makes him/her choose their passers.

For the AL-N and South, which are attached to the instrumentalities of Brazil, due to the distances, each candidate is received by two persons: the member of the ICG from their zone and the member from the preceding ICG.

A passant may, if he thinks fit, refuse a passer and draw out another name.

When his/her testimony is finished, the passant communicates the fact to the Secretary.

**The Secretaries of the Pass** progressively transmit to the secretaries of the ICG:

- the list of requests for the pass;
- the list of passes put into effect after the candidates are interviewed by a member of the local Committee, with the name of the two passers, and all the necessary information for allocation by the cartel. (See further remarks further on);
- the declaration of the finalised passes.

The ICG is responsible for directing the passes towards one of the cartels of the pass taking into account languages and incompatibilities. These are to be evaluated in each case by the ICG. It should arrange matters so as to avoid the presence in the cartel of: the analyst of the passant, the current supervisor, a current analysand of the same analyst, as well as, if applicable, those who are too close to the passant.

When the cartel arrives at its decision:

##### Transmission of the responses of the cartels of the pass

- The cartel transmits to the passant a few detailed notes precisely related to his/her case, which it also sends to the ICG.
- One member of the cartel transmits this text to the passant, directly when this is possible, or by telephone. The passant may, if he/she wishes, subsequently meet with another member of the cartel.
- The response Yes/No is communicated for archiving to the Secretariat of the ICG and to the Secretariat of the pass concerned.

- **The Secretariat of the ICG** (composed of the two secretaries of the ICG) keeps a register of all the stages, informs the ICG of the passes to be examined, and transmits for each pass, when the time comes, the response of the cartel of the pass and its composition to the Secretary of the local DEL concerned.
- The ICG transmits the ensemble of these rules of functioning to the various local secretariats.

### 3. The cartels of the pass

Three cartels are constituted for a period of two years. They are responsible for producing a ruling on the passes, and to work on the expected elaborations.

Each of the three cartels comprises a member from Spain, a member from South America, three (and for one of them four) French members.

### 4. Other procedures

- The Analysts Members of the School (AMSs) of the SPFLF may propose passers as established in the text of "Principles". They do so at the time which appears opportune to them to the local Committee in charge of the secretariat of the pass of their zone or of the zone to which they are attached in relation to the instrumentalities of the School. Each committee may also address themselves to the AMSs, notably to the AMSs of the attached forums.
- The Secretariats of the pass have the passants draw their passers from a list of passers comprising those passers who are not yet engaged in the pass, or failing that, who have the least number of them.
- The passers must be necessarily of the same language as the passant, or of a language spoken by the passant, but not necessarily from the same place.
- The mandate of a passer is limited to four passes or two years.
- It would also be necessary for the local committees to ensure that the passant that draws his passers is ready to commence his/her testimony without delay, and that the testimony does not go on indefinitely.

## THE GUARANTEE

### 1. The composition of the International Committee of Accreditation of the AMSs

In the second year of its mandate the ICG elects the International Committee of the Guarantee from amongst its members. Its composition has regard for proportionality in relation to the number of members of the School in each zone. The list of new AMSs is published in June/July of the second year.

### 2. Functioning

From its inauguration, the ICG reminds the local committees of their responsibilities concerning the criteria and gathering of information, on possible AMSs, notably in the zones attached to an instrumentality of the School.

The local Committees for the Guarantee communicate at all times their proposals for AMS for their instrumentality.

On its part, the International Committee of Accreditation establishes at the most once a year the new list of AMSs.

### **LOCAL COMMITTEES OF THE SCHOOL 2008/2010:**

#### **Admission of members of the School**

- a) Articulation between admission to the Forum and to the School.

It appears that the rule of first entering the Forum and then the School should be maintained. It must however be applied with tact, and in exceptional cases the simultaneous admission to the Forum and the School should be considered.

- b) The criteria for admission have been reconsidered; this has led to the following suggestions:

- Two interviews or one interview with two people does not seem too much.
- Account is taken of regular participation in the activities of the Forum or of the pole, notably in cartels, and if applicable in the Clinical College to which the candidate belongs.

The broader participation in national activities, such for example conferences, must also be taken into account.

Since our School has international instrumentalities, the international dimension cannot be ignored. It is necessary at least that at the time of the first interview this dimension

be presented to the candidate who may be unaware of its existence, so that he/she knows before his/her second interview what he/she proposes to get involved in.

- The published works following on from conferences, inter-cartels meetings, etc. are an objective factor of the candidate's involvement to be taken into account.
- Consultation with the analyst or supervisor should not be obligatory. It is for the Committee to judge if it may be appropriate in particular cases.
